Information for the Defense Community DTIC®

Did you know that DTIC

Is older than the Department of Defense?

Developed one of the world's first online bibliographic databases?

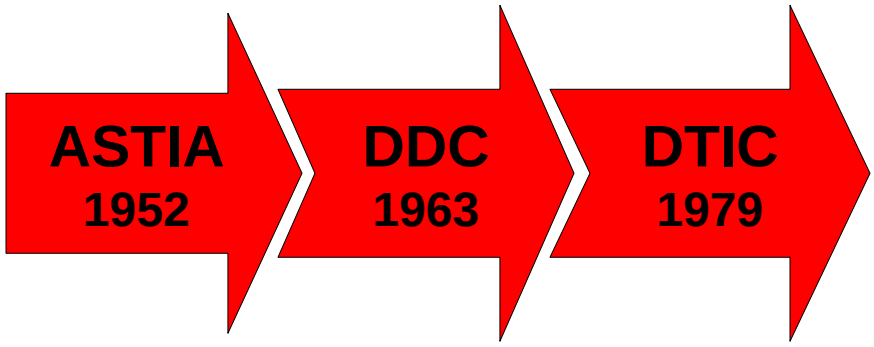
Fielded its first Web site in 1994, and has developed more than 100 Web sites for the Department of Defense and military services?

Has a collection of more than 2 million technical reports?

Information for the Defense Community DTIC®

DTIC Milestones

From the ashes of World War II…



2004+ DoD Field Activity (Defense Research & Engineering)

Information for the Defense Community DTIC®

Why DTIC?

- **Defense scientific & technical information collections**
  - **Collect**
  - **Organize**
  - **Disseminate**
- **Chartered to support Defense and Federal Community**

Information for the Defense Community DTIC®

DTIC Information Resources

Collaborative Resources

Collaborative Resources:

- Resources which DTIC has produced for or in coordination with other organizations
- Online information sources hosted on DTIC site for the Defense community

Examples:

- DoD Web Sites
- Military Journals
- Federal Databases

Information for the Defense Community

What's in DTIC Collections?

- **Types of information**
  - **Public release**
  - **Controlled unclassified information (CUI)**
  - **Classified information**
- **Controls**
  - **Public access/Unlimited**
  - **Registration required**

Information for the Defense Community DTIC®

What Does DTIC Make Available?

Over a million reports and documents including:

- Technical reports & memos
- Studies & analyses
- Theses & dissertations
- DoD directives & instructions
- Test results
- Journal articles
- Conference proceedings
- Patent information
- Command histories

Related DoD Web sites and information support

- National Technical Information Service (NTIS)

Information for the Defense Community DTIC®

Digitization

- **Technical Reports (TR) Collection**
  - **Majority of new accessions are digital submissions**
  - **Older material digitized systematically and for emergency situations**
- **Current Total of Technical Reports: 2,097,017**
- **Current Digital Holdings (full text) in TR**
  - **283,651 unclassified, unlimited documents (public)**
  - **174,287 unclassified, limited documents (controlled)**
  - **14,528 classified documents**

(6/12/08)

Welcome to the

Defense Technical Reports Automated Information List (TRAIL)

Subscribe | Update Subscription | DTIC

TRAIL is a free electronic mailing list that automatically disseminates citations to DTIC's unclassified/unlimited technical reports recently added to the DTIC technical reports database. Our technical reports are categorized according to DTIC's 25 subject categories and 251 groups and subgroups which are described more fully in the Subject Categorization Guide for Defense Science and Technology.

TRAIL subscribers may choose to receive their first bibliography via email immediately after subscribing; [illegible] every two weeks. The bibliography is based on the categories and subgroups chosen on the subscription form.

FIELDS GROUPS: LIGHTER-THAN-AIR AIRCRAFT
CORPORATE AUTHOR: NAVAL RESEARCH ADVISORY COMMITTEE ARLINGTON VA
TITLE: Lighter-Than-Air Systems for Future Naval Missions
DESCRIPTIVE NOTE: Briefing charts
REPORT DATE: 04 OCT 2005
PAGINATION: 52 PAGES
MONITOR ACRONYM: XB
MONITOR SERIES: NRAC
DESCRIPTORS: *NAVY, *MISSIONS, *AIRSHIPS, *BALLOONS, DEPLOYMENT, DETECTORS, HIGH ALTITUDE, COSTS, SURVIVABILITY
SUPPLEMENTARYNOTE: The original document contains color images.
IDENTIFIERS: LTA(LIGHTER-THAN-AIR), LIGHTER THAN AIR VEHICLES, LIMITATIONS, AEROSTATS, HEAVY LIFT, BRIEFING CHARTS
LIMITATIONCODE: 01 00 00
ABSTRACT: Outline of presentation: Panel Membership; Terms of Reference; Categories of LTA Vehicles; Executive Summary; Study Flow; Briefings Received; LTA vehicles and characteristics; Missions; LTA Categories vs Missions Matrix; Study Findings- Aerostat and Low Altitude Airship, High Altitude Airship, Heavy-Lift Hybrid Airship; Conclusions; Summary Recommendations.

Measurement of the Behavioural, Cognitive, and Motivational Factors Underlying Team Performance

In the military the use of teams to perform complex work functions is pervasive. Team performance is therefore critical, across a range of work contexts, for fulfilling operational requirements. To understand team performance, it is necessary to measure team performance. Valid and reliable measurement of the variables underlying effective team performance is fundamental to both team training and team training research, as it enables the determination of the strengths and weaknesses of teams, the design of targeted training programs, the provision of constructive feedback, and the evaluation of training effectiveness. This report presents, for the first time in a single resource, an overview of both the variables underlying effective team performance and the ways in which these variables have been operationalised and measured in the research literature.

Communicating with Intent: DOD and Strategic Communication

The Department of Defense's (DoD's) development of strategic communication processes, a supporting organizational structure, and an institutional culture change began in earnest in 2006. The broad, operational view of communication presents many opportunities for DoD; it also presents many areas demanding attention if the department is to realize its aim of positive strategic effects in the information domain. This paper examines DoD's development of strategic communication with a specific examination of the implications, opportunities, and threats associated with the public information environment. The paper does not present a prescription for tactics to win near-term battles, but rather a review of current efforts to build a strategic communication capacity and considerations that demand attention to advance this capability for long-term, strategic successes. The primary research methodology used for the paper was personal interviews with people either engaged in DoD's development of strategic communication processes, or able to give a perspective from another part of the U.S. government. The paper also relies heavily on published information from the academic and open press environments.

The Right US Strategy for Iran

This study uses the lens of history to elucidate barriers that have confounded a successful U.S. foreign policy strategy for Iran. The authors develop a new strategy that blends pressure and engagement to overcome these barriers. The Iranian people's perceptions and patterns of behavior have historical roots in Persia's greatness and cultural pride, long-standing resentment of foreign influence, Persian-Shiite isolation, and the gradual emergence of pragmatic national interests over revolutionary ideology. Analysis further demonstrates how Iran's unique characteristics are vulnerabilities that can be taken advantage of by U.S. strategic planners. Recent U.S. policies toward Iran are evaluated to provide a better understand of U.S. perceptions of Iran and how these have contributed

DTIC® Guidelines for Determining Copy Rights

[Back to Selection Criteria] [Submitting to DTIC]

Purpose

Because R&D managers and STI information center staff are often uncertain about what to do with documents that c
these guidelines have been written to help managers and staff in determining Government rights in copyrighted work
for professional legal advice: ***Because the copyright law is complex and situation-based, consult your agency lega***
questions.

1) Is this a document authored by Government employees?

If yes, it is NOT COPYRIGHTED and the Government may reproduce and distribute the work.

2) Is this document a joint work by Government and non-Government authors?

If yes, the Government may reproduce and distribute works made jointly by non-Government parties and Governme
employees working within the scope of their Government jobs.

For copyright questions about government documents, refer to DTIC Copyright Guidelines.

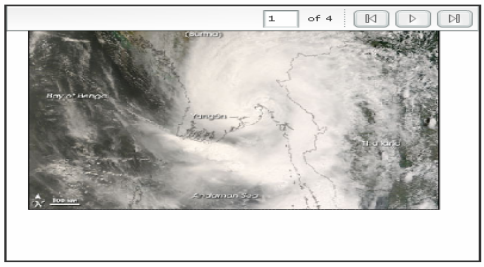
Cyclone Nargis Flooding in Myanmar (Burma)



Special thanks are given to all those people outside of the Topographic Engineering Center who helped in this emergency project. They include the Reference Staff of the US Geological Survey Library who replied promptly to our requests and made their services so accessible (http://library.usgs.gov/); the public services staff of the Defense Technical Information Center (DTIC) who responded so quickly to our requests, and bent over backwards to make their information available online to the public (http://stinet.dtic.mil); the Reference Staff of the Geography and Map Division, The Library of Congress (http://www.loc.gov/rr/geogmap/) and to Mr. Willie Sayeed of RefWorks for the use of their services in putting together and updating the bibliography of citations from so many different electronic and manual resources so quickly (www.RefWorks.com).
